DETAILED ACTION

Election/Restrictions

Claims 1- 42 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-24, drawn to a semiconductor device, classified in class 257, subclass 347.

Group II. Claims 25-42, drawn to an apparatus, classified in class 438, class 473.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as apparatus used to make the product and product made. The inventions are distinct if either or both of following can be shown: (1) that the apparatus as claimed can be use to make other and materially different product or (2) that product as claimed can be made by another apparatus and materially different apparatus. In the instance case unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by the apparatus materially different from those of the group II invention.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields

of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
